Welcome to **Versatile Solutions**
Offshore Development India

1) **What is offshore??**

Off shoring describes the relocation by a company of a business process from one country to another -- typically an operational process, such as manufacturing, or supporting processes.

2) **Why outsource at Versatile??**

Versatile Solutions is a software development & web application development outsourcing company, with emphasis on high quality, timely delivery and cost-effective offshore software & offshore web development services. We have worked with clients across multiple continents and are very aware of the challenges associated with offshore software development.

We provide advice and recommend sites that are concerned with offshore services, offshore solutions development and offshore software development.

Versatile provides comprehensive solutions for clients' market facing business processes such as research, product development, marketing, sales and customer service. We provide front-end services such as onsite consulting, sales and off shore liaison, while simultaneously creating and aligning world class technologies to these business processes. We use innovative engagement models to help overcome budget, schedule and resource constraints.

We provide full lifecycle product engineering, independent testing, security, staff escalation, as well as professional services for disparate industry segments.

Our commitment to quality & timelines has helped us to gain advantage over our competitors and goodwill among our clients. At Versatile Solutions, we bring together technologies, partnerships, and resources to provide positive blend for IT investments.
